
BB0: acquisition
enough frames? (≥ 10)
no
drop frame
frames
BB1: feature build
split into 4 sensor blocks
per-axis mean/std min/max
concat into 64-feature vector
shape check
features
BB2: inference
load trained model
reshape (1,−1)
model predict + probability
BB3: dispatch
confidence ≥ threshold?
yes
look up gesture→ action
execute action (uinput)
no
return no action
