Presentation Guide

10 minutes · 12 slides maximum · every member presents

Project title	
Presentation date and slot	
Presenter order	

Rules

- **10 minutes, hard stop.** You are stopped at 10:00 whether or not you have finished. Rehearse with a timer.
- **12 slides maximum,** title slide included. Fewer is fine. Backup slides after the end slide are allowed and do not count, but are shown only if asked.
- **Every member presents** the part they built, and answers questions on it.
- **The demo is inside the 10 minutes.** Live or a recorded video of 90 seconds or less. Have the video ready even if you plan to demo live.
- **Your slides follow your report.** Every number on a slide must also appear in the report, with the same value.

Required sections

Cover every section below, in this order. You choose how many slides each section gets, as long as the total is 12 or fewer. Suggested times add up to 10 minutes.

#	Section	Must show	Suggested time
1	Title and team	Project title, each member with the module they own	0:20
2	Problem and requirements	The problem in one sentence; the 3–5 requirements that matter most, with measurable targets	1:00
3	Concept and alternatives	The options you compared for the key decision and why you chose this one	1:00
4	Architecture and hardware	Block diagram; a photograph of the build	1:00
5	Design models	CDFG critical path, system FSM and task schedule — final versions, with what changed since Review 2	2:00
6	Implementation	Firmware structure and how the models map to code	1:00
7	Optimisation	One optimisation with before and after figures	0:40
8	Results against	Test results set against the targets from section 2 — pass,	1:00

#	Section	Must show	Suggested time
	requirements	fail, by how much	
9	Demo	Live or a video of 90 seconds or less	1:30
10	Limitations and lessons	What fell short, what you would change	0:30

Slide design

- One idea per slide. If a slide needs a paragraph to explain, split it or cut it.
- Body text 24 pt or larger. Diagrams must be readable from the back of the room — redraw them for slides rather than pasting the report figure.
- Results as a chart or a short table, never a screenshot of a spreadsheet.
- Every number carries a unit, and a target to compare it with where one exists.
- No full sentences read aloud from the slide.

Planning sheet

Fill this in when you rehearse. Hand it in with your slides if asked.

Slide	Section #	Title	Presenter	Time

Total time at rehearsal:

How it is marked

The presentation, the report and the demo are marked together in the Final review (60 marks). The presentation feeds directly into **Presentation and contribution** and **Hardware integration and demo**, and is where each member's individual modifier is confirmed.
